

Nurses

Clinical Nurse Coordinators

The Fetal Treatment Center's nurse coordinator is integral to your experience at UCSF. She will coordinate your care, beginning with communication with your health care provider. She will coordinate your various appointments with sonography, echocardiology, laboratory testing, and arrange consultations with medical team members. You should feel free to contact our coordinator at any time before surgery or after you leave if you have any concerns.

OB Nurses

Our OB nurses will provide you with expert care throughout your stay. They will help you recover from surgery, provide pain relief, help to monitor your uterus, and oversee the fetus's well-being.

Operating Room Nurses

Our OR nurses assist the surgeons in the operating room and also may be available to you before surgery to answer any questions you have about the procedure itself. You will see them briefly when you arrive in the operating room the day of the surgery. Our operating room nurse clinical specialist is Cassandra Robertson.
