Curriculum Vitae

Education

- UCSF School of Medicine 1979

Residencies

- University of Minnesota Hospital and Clinics, Internal Medicine 1980
- UCSF Medical Center, Radiology 1985

Fellowships

- Michael Reese Hospital and Medical Center, Chicago, Nuclear Medicine 1982
- UCSF Medical Center, Diagnostic Radiology 1986

Research Interests

- Post-menopausal bleeding
- Saline infusion sonohysterography
- Fetal anomalies
- Fetal chest mass
- Fetal central nervous system
- Sonography versus MRI
- Periventricular leukomalacia.

Biography

Dr. Ruth Goldstein is a radiologist who specializes in ultrasonography for adults and children. She is a member of the Fetal Treatment Center at UCSF Benioff Children's Hospital and conducts research on improving the detection of fetal anomalies, especially those of the brain, spine and thorax. She also participates in the evaluation of adults with other conditions such as those who are candidates for liver transplants and those experiencing post-menopausal bleeding. She is board certified in diagnostic radiology.

Goldstein earned a medical degree at UCSF, where she also completed a fellowship in diagnostic radiology. She completed a fellowship in nuclear medicine at Michael Reese Hospital and Medical Center in Chicago. Goldstein has been a member of the UCSF faculty since 1986, where she is a professor of radiology, obstetrics, gynecology and reproductive sciences. She also was the director of residency training in diagnostic radiology for nine years.
