- Oxygen toxicity in premature infants

Biography

Dr. Emin Maltepe is an attending neonatologist at UCSF Benioff Children's Hospital. Maltepe's research focuses on hypoxia, epigenetics, placenta, in utero programming of adult disease and neonatal outcomes. In addition to treating patients, Maltepe is an assistant adjunct professor in the UCSF Division of Neonatology. He received his medical degree from the University of Chicago Pritzker School of Medicine, and completed an internship, residency and fellowship in pediatrics at UCSF.
