

## Luke Judge, M.D.

Clinical Instructor, Department of Pediatrics, Division of Neonatology

### Contact Info

Phone 415-476-1888

## Curriculum Vitae

### Education

- University of Washington, Seattle, WA, M.D., Ph.D.

### Residencies

- University of California, San Francisco, Pediatrics Residency

### Fellowships

- University of California, San Francisco, Department of Pediatrics, Neonatal-Perinatal Medicine Fellowship

### Board Certifications

- 2007, American Board of Pediatrics, General Pediatrics

### Program Affiliations

Gladstone Institute of Cardiovascular Research <sup>[1]</sup>

### Clinical Expertise

- Pediatrics
- Neonatology

### Research Interests

- Inherited diseases of skeletal and cardiac muscle
- Pluripotent stem cells and directed differentiation
- Genome editing
- Gene and cell therapies

## Biography

Dr. Judge completed his MD and PhD at University of Washington School of Medicine in Seattle, WA as a part of the Medical Scientist Training Program. His graduate work was performed through the interdisciplinary Molecular and Cellular Biology program in the laboratory of Dr. Jeffrey Chamberlain, where he focused on dystrophin protein function and therapeutic gene replacement for Duchenne Muscular Dystrophy. He joined UCSF in 2008 as a fellow in the Molecular Medicine Training Program, where he completed his clinical training in Pediatrics and Neonatology. His fellowship research was supported by a Clinical Scholar award from the California Institute of Regenerative Medicine, with Dr. Bruce Conklin at the Gladstone Institute of Cardiovascular Disease as his mentor.
