

# We are looking for samples of **FETAL/PEDIATRIC TERATOMAS** to establish a cell atlas

## Types of Tumors

- Any fetal/pediatric teratoma
- Sacrococcygeal teratomas
  - Head and neck teratomas
  - Mediastinal teratomas, etc

**Sample Types:** Fresh or banked (FFPE)

Fresh: we provide materials to save tissue

Banked: samples from the last 5 years

## Study Goals

- Establish an atlas of fetal/pediatric teratomas
- Understand factors related to recurrence
- Develop biomarkers for patient follow-up

Contact us if you have  
a potential sample
